

How to Switch between Different Students

Once logged into your account, you will see a “Change Student” option on the menu bar. Place your mouse cursor over that option (or click on it if using a mobile device), and any students associated with your account will appear in the list.

Although you will see an option to add a student to your account, that option will not be used. If you do not see one of your children on your account, please contact your child's campus.

Students will not have the ability to see other student accounts.
