

# PRECALCULUS

Did you know that taking a math class can help you become a more creative and independent thinker?

OnRamps Precalculus is not just about learning equations and plugging in numbers—we take a different approach. You'll work with your classmates and teacher to make connections between algebra and geometry topics, ask questions to discover how and why a function works, and feel empowered to make logical arguments to your peers. You'll gain confidence as you present solutions to the class and earn a solid foundation for future math courses.

**“[OnRamps Precalculus] challenged me to go beyond the surface level of math and really dive deep to understand it... I feel like I have a solid understanding of the course material because of the way it was taught in OnRamps.”**

- Former OnRamps Precalculus Student

- ✓ Grow your problem-solving and abstract thinking skills.
- ✓ Build a firm foundation for calculus and future college-level math classes.
- ✓ Develop new ways to communicate, study, and manage your time and assignments.
- ✓ Earn transferable college credit and prepare for success in college and a career.

## DID YOU KNOW?

The concepts you learn in precalculus and calculus are used far beyond the classroom; with applications ranging from engineering to physics, astronomy, economics, and more!

## TRANSFERABILITY

TCCN: MATH 2412

UT Course Code: M 305G

3 College Credits

Tarleton Course Code: MATH 2412

4 College Credits

## PRE-REQUISITES

Algebra II

Geometry

No test or application required to enroll
